

Exsite Enhanced Series Cameras

This document describes the features, operational issues, and major fixes for the new ExSite Enhanced Series cameras. Review each section to determine if an upgrade is warranted for your installation. For additional information on the camera (including the latest updates to documentation, product specifications, and software downloads), visit the Pelco Web site at www.pelco.com.

NOTE: For technical issues, contact Pelco Product Support at 1-800-289-9100 (USA and Canada) or +1-559-292-1981 (international).

2.11.1.7 Release

New Features and Improvements

- Added support for Pelco Camera Link, a new technology that enables two Pelco camera products to work together: Enhanced Series PTZ cameras and Optera. This feature is available at the Camera Web UI and allows you to set up the two cameras so that you can take advantage of the benefits of both cameras (e.g. the panoramic views of Optera and the ability to zoom for great detail with Enhanced Series PTZ cameras). You need to use the latest firmware for both cameras and establish a link between the cameras.
- Added support for integrating VideoXpert with Pelco Camera Link functionality.
- Added the ability to update firmware from the Web Client.
- Added updated default image quality settings.
- Added support for IP Camera Filtering.

Major Fixes

- Corrected an issue causing a problem with granular control of zooming in and out on old web pages using a Chrome or Edge browser.
- Corrected a problem with the web client getting into a "Not Found" state where it was unusable.
- Corrected a problem with Exponential PTZ Control Type causing the PTZ speed to always remain slow.
- Corrected a problem with Tooltips for RTP Settings, a Simple Motion Detection Warning, and some handler names not being localized.
- Corrected an issue with the Normal default contrast settings to improve the contrast level of images.
