

University Campus in Southern US relies on Endura VMS, Sarix Cameras to protect 11,500+ students

by **Schneider** Electric

Success Story

Application Type: **Education**

Location: **USA**

Issue

A large, open, university campus in the Southern United States, with more than 11,500 students spread across nearly 50 buildings, wanted to upgrade and expand their existing analog video surveillance system. Campus management needed to cover new building additions to their facility, as well as begin the migration toward a substantial IP-based camera system.

Solution

An Endura IP Video Management System was selected in order to create a fully-distributed system, incorporating existing cameras as well as 350 new IP cameras. Additionally, the system was designed to bring all monitoring activity back to a central location.

Designed for performance, premium experience, and mission-critical applications, the Sarix Enhanced Range with SureVision 2.0 delivers industry-leading image quality in the most difficult lighting conditions.

Endura™ is the ideal video management system (VMS) for mission-critical surveillance operations requiring around-the-clock monitoring and unwavering reliability. It provides the tools security and IT professionals need to effectively safeguard people and property.

Superior Sarix Enhanced image quality, combined with the scalability and functionality of the Endura system has provided campus management with the ability to easily monitor, capture and review video.

Products

- Sarix Enhanced Cameras
- Endura Video Management

About Sarix Enhanced

- Unsurpassed image quality in the toughest lighting situations
- Superior reliability and ruggedness for mission critical applications
- Premium design and experience

- Up to 3 Megapixel Resolution
- Up to 30 IPS at 3 MPx
- Auto Back Focus (ABF)
- PoE, IEEE 802.3af
- Adaptive Motion Detection and Camera Sabotage Analytic
- Local Storage (Micro SD)
- ONVIF® Profile S Conformant
- 3-Year Warranty and Support

About Endura

- For mission-critical installations
- Designed for 24/7 surveillance
- Predictable performance for reliable scalability
- Integration to multiple building and security systems
- Scalable to accept thousands of HD and megapixel cameras
- Complete API available
