Esprit® Enhanced Series IP Positioning System
STANDARD/PRESSURIZED MODELS, UP TO 30X OPTICAL ZOOM, FULL HD, WDR

Product Features

- SureVision 3.0 Technology, Including:
  - 130 dB Wide Dynamic Range (WDR)
  - Advanced Low Light Down to 0.03 lux on Select Models
  - Anti-Bloom Technology
  - 3D Noise Filtering
  - Enhanced Tone Mapping
- Up to Full HD 1080p and up to 30 Images per Second (ips)
- Three Automatic Defog Options
- Electronic Image Stabilization (EIS)
- Pan/Tilt and Enclosure with Integrated Optics Package (IOP) or Pressurized Integrated Optics Cartridge (IOC)
- 16 Preset Tours, 256 Presets, 32 Window Blanks
- Integrated Windows Wiper with Configurable Delay and Shut-Off on Select Models
- Built-in Analytics Suite
- Compatible with Pelco and Third-Party Video Systems
- ONVIF Profile S
- 2-Year Warranty and Support

Top of the Line IP Performance
Pelco’s iconic Esprit® Series positioning system provides best-in-class image quality and pan/tilt performance. Esprit Enhanced provides the total package of impressive image quality, valuable software features, and time-tested pan/tilt performance suitable for any installation environment.

Full High Definition SureVision 3.0 Cameras
Esprit cameras have long provided a Full HD 1080p 30x optical zoom camera but with Pelco’s latest product evolution, a powerful new SureVision 3.0 enabled camera is now available that features 130dB of True Wide Dynamic Range and low light performance up to twenty times better than past camera modules. The new SureVision 3.0 camera is available in either a standard or pressurized 30x optical zoom module that delivers market leading image quality for even the toughest outdoor environments. Paired with Pelco’s illuminator SMR modification, the camera ensures that image quality is top-of-the-line, even on the darkest of nights.

Image Enhancement Features
Esprit has historically packed in many features that enhance the total value of the system, and with the new SureVision 3.0 cameras, even more value has been added. Since its inception, the Esprit line has had a full suite of built in video analytics, 32 window blanking privacy zones, and electronic image stabilization.

In addition to the vastly improved low light and wide dynamic range performance, the new SureVision 3.0 cameras now provide Image Defog, five new White Balance modes, and the popular Vivid Imaging Mode. Three levels of Image Defog are now available for enhancing the image on foggy or rainy days. The new White Balance modes allow the user to overcome difficult lighting conditions caused by external sources such as Sodium Vapor lamps and the Vivid Imaging mode provides an option for automatically increased color saturation and sharpening when enabled.

Proven Performance and Reliability
Esprit Enhanced brings together the very best in enclosure design, PTZ mechanics, and receiver technologies to produce the industry’s leading high-speed camera system. Installed around the world for more than 15 years, the Esprit line has been constantly updated to provide the latest pan/tilt and imaging performance. The camera is easy to install, easy to use, and highly reliable.

VMS Integration
Esprit Enhanced easily connects to Pelco IP and hybrid video systems such as VideoXpert, Endura 2.0 (or later), and Digital Sentry 7.3 (or later). The camera is also compatible with Digital Sentry NVS (DS NVS), a full-featured video management software, which is available as a free download at www.pelco.com. DS NVS includes four free Pelco IP licenses and allows for the management of video from up to 64 cameras.

Pelco endeavors to be the most open and integrated camera provider in the industry and as a part of that effort Spectra Enhanced is integrated with a long and ever-growing list of 3rd party software and Video Management Systems (VMS).
Pelco’s Esprit® Enhanced Positioning System features a pan/tilt, enclosure, and either an Integrated Optics Package (IOP) or a pressurized Integrated Optics Cartridge (IOC) in a single, easy-to-install system. Options include IOP with or without wiper and IOC models with wiper.

A powder-coated, aluminum construction makes the Esprit Enhanced Series ideal for either indoor or outdoor applications. The system has an absolute operating temperature range of –45° to 60°C (–50° to 140°F). Within two hours after power-up, the entire unit can de-ice and be operational from a temperature of –25°C (–13°F).

The Esprit Enhanced Series variable pan and tilt speeds range from 0.1 to 40 degrees per second in manual pan mode, and 0.1 to 30 degrees per second in manual tilt. Pan preset and turbo speeds are 100 degrees per second. Tilt preset speed is 30 degrees per second.

The Esprit Enhanced Series system’s IOC contains dry nitrogen pressurized to 10 psig, which protects the environment inside the cartridge eliminating internal condensation and corrosion. Sensors strategically placed in the cartridge send an “Alert” message if pressure drops below factory-set acceptable limits. The IOC is factory assembled and installed in Esprit Enhanced Series systems. All labor intensive procedures of setting up the camera, lens and charging the unit with dry nitrogen are eliminated. The miniature size of the cartridge decreases the future need for maintenance and increases the overall reliability of the pressurized unit.

Many models include a window wiper. The wiper is completely integrated into the enclosure and does not interfere with the viewing range of the system. The wiper can be configured to delay between wipes and to automatically shut off after a specified period. The wiper design also allows for easy replacement of the wiper blade. A built-in heater, window defroster/defogger, sun shroud, and insulation blanket are standard features on Esprit Enhanced units, which also includes an open collector auxiliary output to control external devices.

The systems are available with an input voltage of 24 VAC or with a selectable power source of 120/230 VAC. The Esprit Enhanced Series also has a power-up recovery mode that allows the user to specify what operation the system will resume whenever the power is cycled.

**Electronic Image Stabilization (EIS)**

Electronic image stabilization (EIS) is a feature of the camera that can help compensate for some frequencies of vibration. In all cases, care should be taken to ensure that any positioning system is mounted to a rigid location.

The default for EIS is OFF. The user can turn EIS ON if vibration is affecting image quality. Although EIS can reduce the impact of vibration on image quality, it cannot correct for all levels of vibration. Other measures should be taken to isolate the camera from the source of the vibration or to seek a more rigid mounting location.

**PELCO ANALYTICS BEHAVIORS**

The Esprit Enhanced Series includes nine user-configurable behaviors. The camera is capable of running up to three behaviors simultaneously; although, the number of behaviors is limited to the available processing power of the camera and the type of analytic being used.

- **Abandoned Object**: Detects objects placed within a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows. An airport terminal is a typical installation for this behavior. This behavior can also detect objects left behind at an ATM, signaling possible card skimming.
- **Adaptive Motion Detection**: Detects and tracks objects that enter a scene and then triggers an alarm when the objects enter a user-defined zone. This behavior is primarily used in outdoor environments with light traffic to reduce the number of false alarms caused by environmental changes.
- **AutoTracker**: Detects and tracks movement in the field of view. When the AutoTracker behavior is configured, the system automatically pans and tilts to follow the moving object until the object stops or disappears from the monitored area.
- **Camera Sabotage**: Detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed by spray paint, a cloth, or a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.
- **Directional Motion**: Generates an alarm in a high traffic area when a person or object moves in a specified direction. Typical installations for this behavior include an airport gate or tunnel where cameras can detect objects moving in the opposite direction of the normal flow of traffic or an individual entering through an exit door.
- **Loitering Detection**: Identifies when people or vehicles remain in a defined zone longer than the user-defined time allows. This behavior is effective in real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- **Object Counting**: Counts the number of objects that enter a defined zone. This behavior can be used to count the number of people at a store entrance/exit or inside a store where the traffic is light. This behavior is based on tracking and does not count people in a crowded setting.
- **Object Removal**: Triggers an alarm if an object is removed from a user-defined zone. This behavior is ideal for customers who want to detect the removal of high value objects, such as painting from a wall or a statue from a pedestal.
- **Stopped Vehicle**: Detects vehicles stopped near a sensitive area longer than the user-defined time allows. This behavior is idea for airport curbside drop-offs, parking enforcement, suspicious parking, traffic lane breakdowns, and vehicles waiting at gates.

**Note:** Sensitivity in lux for 90% reflectance, f/1.6 (wide angle), 50 dB gain at 30 IRE (30% of signal level) with Sensitivity Boost off; 4X improvement to sensitivity with Sensitivity Boost on.

### SOFTWARE FEATURES

- Multilingual Menus (English, Spanish, Portuguese, Italian, German, French, Russian, Turkish, Arabic, Chinese, and Korean).
- 32 Window Blanks, Configurable in Size
- Configurable Park with Actions
- Proportional Pan/Tilt Continually Decreases Pan/Tilt Speeds in Proportion to Depth of Zoom
- Using the maximum number of window blanks in a single view can affect camera performance and could interrupt certain camera functions.

**VALUES IN PARENTHESES ARE INCHES, ALL OTHERS ARE CENTIMETERS.**
TECHNICAL SPECIFICATIONS

VIDEO

Video Encoding
H.264 High, Main, or Base profiles and MJPEG

Video Streams
Up to 2 simultaneous streams; the second stream is variable based on the setup of the primary stream

Frame Rate
Up to 30, 25, 15, 12.5, 10, 8.333, 7.5, 6, 5, 3, 2.5, 2, 1 (depending on the coding, resolution, and stream configuration)

NETWORK

Supported Protocols
TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, IPv6*, SNMP v2c/v3, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, 802.1x (EAP), and NTCIP 1205

Users

Unicast
Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)

Multicast
Unlimited users H.264

Security Access
Password protected

Software Interface
Web browser view and setup

Pelco System Integration
VideoXpert

Endura 2.0 (or later)
Digital Sentry 7.3 (or later)

Open API
Pelco API or ONVIF Profile S

MINIMUM SYSTEM REQUIREMENTS

Processor
Intel® Core™ i3 Processor, 2.4 GHz

Operating System
Windows® 7 (32-bit and 64-bit) with DirectX® 11, Windows XP Service Pack 3 with DirectX 9.0c, or Mac® OS X 10.4 (or later)

Memory
4 GB RAM

Network Interface Card
100 megabits (or greater)

Monitor
Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution

Web Browser
Internet Explorer 8.0 (or later) or Firefox 3.5 (or later); Internet Explorer 8.0 (or later) is recommended for configuring analytics

Media Player
Pelco Media Player† or QuickTime® 7.6.5 for Windows XP and Windows 7; or QuickTime 7.6.4 for Mac OS X 10.4 (or later)

*Supports mixed IPv4 and IPv6 installations, but not IPv6-only deployments.
†Pelco Media Player is recommended for control, smoothness, and reduced latency as compared to QuickTime.
TECHNICAL SPECIFICATIONS

ANALYTICS

Required Systems for Pelco Analytics
- Pelco Interface WS5200 Advanced System Management Software on an Endura 2.0 (or later) system
- Pelco API
  - The Pelco API can transmit behavior alarm data to third-party applications, available at pdn.pelco.com

GENERAL

Construction
- Die-cast, extruded and sheet aluminum; stainless steel hardware

Finish
- Gray polyester powder coat

Operating Temperature
- –45°C to 60°C (–50° to 140°F) for outdoor applications or 74°C (165.2°F) absolute maximum ambient per NEMA TS-2; within two hours after power-up, the entire unit can de-ice and be operational from a temperature of –25°C (–13°F)

Storage Temperature
- –20° to 60°C (–4° to 140°F)

Operating Humidity
- Standard with IOP: 5 to 90% relative humidity (noncondensing)
- Standard with IOC: 5 to 100% relative humidity (condensing)

Weight
- Pedestal Adapter
  - Standard with IOP 9.0 kg (20 lb) 9.9 kg (22 lb)
  - With Wiper and IOP 9.5 kg (21 lb) 10.4 kg (23 lb)
- Wall Mount
  - Standard with IOP 10.0 kg (22 lb) 11.0 kg (24 lb)
  - With Wiper and IOC 11.3 kg (25 lb) 12.6 kg (28 lb)

Shipping
- Standard with IOP 11.3 kg (25 lb) 12.6 kg (28 lb)
- With Wiper and IOP 11.7 kg (26 lb) 13.1 kg (29 lb)

PRESSURIZED INTEGRATED OPTICS CARTRIDGE (IOC)

- Pressurized to 10 psig, Nominal (Sea Level, 21°C [70°F])
- Internal Sensor for Low Pressure Alarm
- Designed to IP67 Standards
- U.S. Patent D472,260

MECHANICAL

Variable Speed
- 0.1° to 100°

Preset Accuracy
- ±0.1°

Pan Movement
- 360° continuous pan rotation

Vertical Tilt
- Unobstructed +36° to –65°

Manual Pan/Tilt Speeds
- Pan 0.1° to 40°/sec manual operation
- Tilt 0.1° to 30°/sec manual operation

Preset Speeds
- Pan 100°/sec
- Tilt 30°/sec

Wind Speeds
- Full Motion Control 0-52 knots (60mph/97kph)
- Limited Speed Control 52-78 knots (90mph/145kph)
- Hold Position 78-96 knots (110mph/177kph)
- Survives 96-130 knots (150mph/241kph)

ELECTRICAL

Input Voltage
- 24, 120, or 230 VAC, 50/60 Hz; switch selectable for 120/230 VAC inputs

Input Voltage Range
- ±10%

Power Consumption
- Maximum 70 VA per system

Heater and Defroster
- Thermostatically controlled

Electrical Connections
- 24 VAC
- 120/230 VAC

Aux 2
- Open collector output with 2-second activation; connected relay must require no more than 32 VDC and 40 mA to energize relay coil; wire length between Esprit and relay must be less than 3 m (9.84 ft)

CERTIFICATIONS/RATINGS

- CE, Class A
- FCC, Class A
- KCC
- UL/cUL Listed
- C-Tick
- NEMA TS-2 (Temp.) para 2.2.7.3 - 2.2.7.7
- Meets NEMA Type 4X and IP66 Standards
- ONVIF Profile S

REPLACEMENT INTEGRATED OPTICS PACKAGE (IOP)

The following IOP models are replacement components only; they are not interchangeable.

IOP-30L
- Esprit Enhanced 1080p resolution SureVision 3.0 extreme low light and WDR camera and lens module, 30X replacement IOP module

REPLACEMENT PRESSURIZED INTEGRATED OPTICS CARTRIDGE (IOC)

The following IOC models are replacement components only; they are not interchangeable.

IOC-30L
- Esprit Enhanced 1080p resolution SureVision 3.0 extreme low light and WDR camera and lens module, 30X replacement IOC module

OPTIONAL ACCESSORIES

- ES-REPLBLADE-2 Package of 2 window wiper replacement blades
- ES-REPLBLADE-10 Package of 10 window wiper replacement blades

*Pedestal mount models include Esprit EPP pedestal adapter plate. Use with PM2000/PM2010 mount (not supplied) for pedestal application.

† Wall mount models include Esprit EWM wall mount. Optional mounting adapters for corner, pole, and parapet applications are available.

### OPTIONAL MOUNTS AND ADAPTERS

- ECM100: Corner mount adapter for use with EWM wall mount
- EPM: Pole mount adapter for use with EWM wall mount
- EA4348: EWM-to-Legacy adapter; use with PP4348 parapet mount
- PM2000/PM2010: Pedestal mount with cable feedthrough. For use with Esprit systems with EPP pedestal adapter plate.

### RECOMMENDED POWER SUPPLIES

- MCS Series: Multiple 24 VAC camera power supply, indoor
- WCS Series: Single/multiple 24 VAC camera power supply, outdoor
