Important Safety Instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
6. To reduce the risk of ignition of hazardous atmospheres, disconnect the equipment from the supply circuit before opening. Keep assembly tightly closed when in operation.
7. The maximum ambient temperature range is -76°F to 140°F (-60°C to 60°C).
8. Only use attachments/accessories specified by the manufacturer.
9. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
10. Installation should be done only by qualified personnel and conform to all local codes.
11. Unless the unit is specifically marked as a NEMA Type 3, 3R, 3S, 4, 4X, 6, or 6P enclosure, it is designed for indoor use only and it must not be installed where exposed to rain and moisture.
12. Use only installation methods and materials capable of supporting four times the maximum specified load.
13. Use stainless steel hardware to fasten the mount to outdoor surfaces.
14. AN ALL-POLE MAINS SWITCH with a contact separation of at least 3 mm in each pole shall be incorporated in the electrical installation of the building.
15. A readily accessible disconnect device shall be incorporated in the building installation wiring.
16. **CAUTION:** These servicing instructions are for use by qualified service personnel only. To reduce the risk of electric shock do not perform any servicing other that contained in the operating instructions unless you are qualified to do so.
17. Only use replacement parts recommended by Pelco.
18. A certified flameproof, "d," sealing device such as a stopping box with setting compound shall be provided, either in the flameproof enclosure or immediately at the entrance thereto.
19. For ambient temperatures below 14°F (-10°C) use field wiring suitable for both minimum and maximum ambient temperature.

The product and/or manual may bear the following marks:

⚠️ **WARNING:** This symbol indicates that dangerous voltage constituting a risk of electric shock is present within this unit.

⚠️ This symbol indicates that there are important operating and maintenance instructions in the literature accompanying this unit.

⚠️ **WARNING:** HAZARDOUS MOVING PARTS. KEEP FINGERS AND OTHER BODY PARTS AWAY.

⚠️ **WARNING:** To reduce the risk of ignition of hazardous atmospheres, disconnect the equipment from the supply circuit before opening. Keep assembly tightly closed when operating.

⚠️ **WARNING:** To reduce the risk of ignition of hazardous atmospheres, conduit runs must have a sealing fitting connected within 2 inches of the enclosure.

⚠️ **TO REDUCE THE RISK OF IGNITION DO NOT OPEN WHEN AN EXPLOSIVE GAS ATMOSPHERE MAY BE PRESENT.**
Description

ExSite®/ExSite IP Series are innovative integrated positioning systems that meet stringent explosionproof requirements, combining a receiver, pan/tilt, and camera in a single, easy-to-install package.

The ExSite IP Series system has all of the features and functionality of the analog ExSite Series and includes a built-in 100Base-TX network interface for live streaming using a standard Web browser.

Both analog and network systems are available with a choice of power module: input voltage of 24 VAC or 100 to 240 VAC.

This manual includes instructions for installing the camera and pan/tilt unit.

⚠️ WARNING: Install the ExSite/ExSite IP Series power module before you install the camera and pan/tilt. For instructions on how to install the power module, refer to the manual included with the power module.

Once the system installation is complete, refer to the operation manual available on the resource disc for instructions on how to operate and your system.

METHODS OF INSTALLATION

The system can be installed in a standard or inverted position. When installed for inverted operation, the camera orientation and controller functions are reconfigured for normal operation through the system’s software. Hardware adjustment is not required for inverted operation.

![Standard and Inverted Installations](image)

**Figure 1. Standard and Inverted Installations**

⚠️ **WARNING:** The total weight of the pan/tilt component is 25 kg (55 lb). Use caution when lifting and assembling the pan/tilt component on the power module. It is recommended that non-slip gloves be worn during installation.

During installation, it is important to attach a 10 AWG copper stranded wire (minimum requirement) from the earth ground attachment point on the unit to an appropriate grounding location for your installation.

![Attach an Earth Ground](image)

**Figure 2. Attach an Earth Ground**

1. Earth Ground Attachment Point
Installing the Camera Module

1. Loosen the setscrew at the back of the enclosure with the 1.5 mm Allen wrench (supplied).

![Figure 3. Loosen the Setscrew](image)

**Figure 3. Loosen the Setscrew**

![Setscrew](image)

2. Use the spanner wrench (supplied) to loosen the back of the camera enclosure (refer to Figure 4). Once the back is loose, use your hands to continue to loosen it until it can be removed.

⚠️ **WARNING:** To avoid thread damage, carefully remove the back of the camera enclosure. Never use force to remove the back of the camera enclosure.

![Figure 4. Remove the Back Cap of the Enclosure](image)

**Figure 4. Remove the Back Cap of the Enclosure**

- **1** Back Cap of Enclosure
- **2** Spanner Wrench
3. Slide the camera module into the enclosure. Refer to Figure 5 to position the camera module properly in the enclosure.

(Models with a wiper) The tab located inside the enclosure must be pointing down before installing the camera module (refer to Figure 5). To position the tab, place the wiper blade (located at the front of the enclosure) in the center of the viewing window (refer to Figure 6).

⚠️ **WARNING:** Do not force the camera module into the enclosure.

4. Carefully mate the camera’s power connector to the mating connector located inside the enclosure.

**Figure 5. Install the Camera Module**

1. Camera Module  
2. Center Notches  
3. Enclosure Tab  
4. Camera Enclosure

**Figure 6. Center the Wiper Blade**

1. Wiper Blade
5. *(Models with a wiper)* Install the wiper arm (refer to Figure 6).
   a. Place the green bushing (supplied with wiper models) on the stud located behind the handle of the camera module. The bushing should be in the same orientation as shown in Figure 7.
   b. Place the ridge of the wiper arm in the notch of the enclosure tab, and then place the slot of the wiper arm over the green bushing.

6. Secure the wiper arm with the 8-32 Phillips flat head screw (supplied with wiper models).

7. Reinstall the back cap on the enclosure:
   a. Using your hands, turn the back cap clockwise until you can no longer turn it. The back cap should turn easily until it comes in contact with the O-ring. If it does not turn easily, the threads are not aligned and thread damage will occur.
   b. Continue tightening the back cap with the spanner wrench (supplied). There should be no gap between the back cap and the enclosure when the back cap is tightened and properly installed.
   c. Once the back cap is installed, secure the back cap with the setscrew using the 1.5 mm Allen wrench (supplied).

**WARNINGS:**
- To avoid thread damage, carefully install the back cap on the enclosure.
- Never force the back cap onto the end of the enclosure.
- When installation is completed, there should be no gap between the back cap and the enclosure.
Installing the Pan/Tilt Unit

1. Verify that the power module seal is properly seated in the groove on the top of the power module.

![Figure 8. Factory-Installed Power Module Seal](image)

- 1. Power Module Seal
- 2. Power Module

**WARNING:** Use caution when attaching the enclosure unit to the power module. If the grooves on the top of the power module are damaged, the integrity of the unit could be compromised.

2. Attach the pan/tilt unit to the power module.
   a. Align the pins on the pan/tilt unit with the holes on the power module.
   b. Carefully mate the pan/tilt connector to the power module connector.

![Figure 9. Attach the Pan/Tilt to the Power Module](image)

- 1. Locking Ring
- 2. Pins
- 3. Holes
3. Using your hands, carefully thread the pan/tilt locking ring onto the threads of the power module until the threads are completely engaged and can no longer be tightened by hand.

4. Using the spanner wrench (supplied), continue to tighten the locking ring.

5. Tap the spanner wrench handle with a hammer or the palm of your hand to ensure a secure fit.

6. Tighten the locking ring setscrew with the 2 mm Allen wrench (supplied) to secure the assembly.

⚠️ **WARNINGS:**

- Total weight of the pan/tilt component is 25 kg (55 lb). Use caution when lifting and assembling the pan/tilt component on the power module.
- The weight of the pan/tilt unit must be safely supported during installation.
- It is recommended that non-slip gloves be worn during installation.
- Avoid thread damage. Never use force when assembling and tightening the threaded components of the system.
Installing the Sun Shroud

1. Align the mounting holes on the sun shroud with the holes on top of the enclosure.

2. Insert the nylon washers (supplied with sun shroud hardware pack) and the 6-32 Phillips pan head screws (supplied with sun shroud hardware pack) into the mounting holes (refer to Figure 10).

3. Tighten the screws to secure the sun shroud to the enclosure.

Figure 10. Install the Sun Shroud

- Sun Shroud
- Nylon Washers
- 6-32 Phillips Pan Head Screws
To replace the camera module:
1. Remove the back cap of the camera enclosure (refer to Figure 11).
   a. Loosen the setscrew with a 1.5 mm Allen wrench (supplied).
   b. Use the spanner wrench (supplied) to loosen the back cap of the camera enclosure. Once the back cap is loose, use your hands to continue to loosen it until it can be removed.

**WARNING:** To reduce the risk of ignition of hazardous atmospheres, disconnect the equipment from the power supply before opening. Keep the assembly tightly closed when operating.

**Figure 11.** Remove the Back Cap of the Camera Enclosure

1. Back Cap of Enclosure
2. Spanner Wrench
3. Setscrew
2. *(Models with wiper)* Remove the 8-32 Phillips flat head screw (supplied with wiper models) that secures the wiper inside the enclosure.

3. *(Models with wiper)* Remove the wiper arm and the green bushing (supplied with optional wiper kit) from the unit.

4. Slide the camera module out of the enclosure.

---

2. 8-32 Phillips Flat Head Screw
3. Wiper Arm
4. Camera Module Handle
5. Green Bushing
6. Stud
5. Slide the replacement camera module into the enclosure (refer to Figure 13).

⚠️ **WARNING:** Never force the camera module into the enclosure.

*(Models with a wiper)* The tab located inside the enclosure must be pointing down before installing the camera module (refer to Figure 13). To position the tab, place the wiper blade (located at the front of the enclosure) in the center of the viewing window (refer to Figure 14).

6. Carefully mate the camera’s power connector to the mating connector located inside the enclosure.

---

**Figure 13. Install the Camera Module**

1. Camera Module  
2. Center Notches  
3. Enclosure Tab  
4. Camera Enclosure

**Figure 14. Center the Wiper Blade**

1. Wiper Blade
7. (Models with a Wiper) Reinstall the wiper arm (refer to Figure 12 on page 15).
   a. Reinstall the green bushing on the stud located behind the handle of the camera module.
   b. Place the ridge of the wiper arm in the notch of the enclosure tab, and then place the slot of the wiper arm over the green bushing.

8. Secure the camera module and the wiper arm with the 8-32 Phillips flat head screw (refer to Figure 12 on page 15).

⚠️ WARNINGS:
- To avoid thread damage, carefully install the back cap on the enclosure.
- Never force the back cap onto the end of the enclosure.
- When installation is completed, there should be no gap between the back cap and the enclosure.

9. Reinstall the back cap on the enclosure:
   a. Using your hands, turn the back cap clockwise until you can no longer turn it. The back cap should turn easily until it comes in contact with the O-ring. If it does not turn easily, the threads are not aligned and thread damage will occur.
   b. Continue tightening the back cap with the spanner wrench (supplied). There should be no gap between the back cap and the enclosure when the back cap is tightened and properly installed.
   c. After the back cap is installed, secure the back cap with the setscrew using a 1.5 mm Allen wrench (supplied).
Specifications

**ELECTRICAL**
- **Input Voltage**: 24 VAC or 100 to 240 VAC, 50/60 Hz
- **Input Voltage Range**: ±10%
- **Power Consumption**: Maximum 60 W (120 VA) per system
- **Electrical Connections**: 6-foot wire harness with connections for power, video, data control, alarm inputs, and auxiliary outputs

**MECHANICAL**
- **Cable Entry**: One 1.91 cm (0.75-inch) NPT threaded opening
- **Pan Movement**: 360° continuous pan rotation
- **Vertical Tilt**: Unobstructed +90° to –90°
- **Variable Speeds**
  - **Pan**: 0.1° to 40°/sec variable-speed operation
  - **Tilt**: 0.1° to 40°/sec variable-speed operation
- **Preset Speeds**
  - **Pan**: 40°/sec
  - **Tilt**: 40°/sec

**GENERAL**
- **Construction**: 316L stainless steel
- **Finish**: Electropolish
- **Viewing Window**: 12.7 mm (0.50-inch) thick, soda-lime tempered glass
- **Operating Temperature**: –60° to 60°C (–76° to 140°F)
- **Unit Weight**: 25 kg (55 lb)
- **Effective Projected Area (EPA)**: 40.8 square inches

**NOTE**: Please contact Pelco for information on the dimensions of the flameproof joints.

**NOTE**: VALUES IN PARENTHESES ARE INCHES; ALL OTHERS ARE CENTIMETERS.
**CAMERA/OPTICS**

Supported Protocols
TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP, QOS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, mDNS (Bonjour®), and 802.1x (EAP)

Users
- Unicast: Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)
- Multicast: Unlimited users H.264 or MPEG-4

Security Access
Password protected

Software Interface
Web browser view and setup, up to 16 cameras

Pelco System Integration
Endura® 1.5 or later (MPEG-4) or Endura 2.0 or later (H.264); Digital Sentry® 4.2 IP bundle 3 or later; DX8100 Series 2.0 or later; and DVR5100 version 1.5.4 or later

Open IP Integration
Pelco IP camera API

Minimum System Requirements
- Processor: Intel® Pentium® 4 microprocessor, 1.6 GHz
- Operating System: Microsoft® Windows® XP, Windows Vista®, Windows 7® or Mac® OS X 10.4 (or later)
- Memory: 512 MB RAM
- Network Interface Card: 100 megabits (or greater)
- Monitor: Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution
- Web Browser*: Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.0 (or later)
- Media Player*: Pelco Media Player or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

*Internet Explorer is not supported by Mac OS X 10.4.

†This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

PRODUCT WARRANTY AND RETURN INFORMATION

WARRANTY
Pelco will repair or replace, without charge, any merchandise proved defective in material or workmanship for a period of one year after the date of shipment.

Exceptions to this warranty are as noted below:
• Five years:
  – Fiber optic products
  – Unshielded Twisted Pair (UTP) transmission products
• Three years:
  – FO Series and BU Series camera models
  – Fixed network cameras and network dome cameras with Sarix® technology
  – Sarix thermal imaging products (Ti and ESTI Series)
• Two years:
  – Standard varifocal, fixed focal, and motorized zoom lenses
  – D5S/D9S Series fixed dome products
  – Legacy® Series integrated positioning systems
  – Spectra III®, Spectra Mini, Spectra Mini IP, Esprit®, ExSite®, ExSite IP, and PS20 scanners, including when used in continuous motion applications
  – Esprit Ti and Ti2500 Series thermal imaging products
  – Endura® Series distributed network-based video products
  – Genex® Series products (multiplexers, server, and keyboard)
  – PMCL200/300/400 Series LCD monitors
  – PMCL5xxf Series and PMCL5xxNB Series LCD monitors
  – PMCL5xxxBL Series LED monitors

Six months:
• All pan and tilt, scanners, or preset lenses used in continuous motion applications [preset scan, tour, and auto scan modes]

Pelco will warrant all replacement parts and repairs for 90 days from the date of Pelco shipment. All goods requiring warranty repair shall be sent freight prepaid to a Pelco designated location. Repairs made necessary by reason of misuse, alteration, normal wear, or accident are not covered under this warranty.

Pelco assumes no risk and shall be subject to no liability for damages or loss resulting from the specific use or application made of the Products. Pelco's liability for any claim, whether based on breach of contract, negligence, infringement of any rights of any party or product liability, relating to the Products shall not exceed the price paid by the Dealer to Pelco for such Products. In no event will Pelco be liable for any special, incidental, or consequential damages (including loss of use, loss of profit, and claims of third parties) however caused, whether by the negligence of Pelco or otherwise.

The above warranty provides the Dealer with specific legal rights. The Dealer may also have additional rights, which are subject to variation from state to state.

If a warranty repair is required, the Dealer must contact Pelco at (800) 289-9100 or (559) 292-1981 to obtain a Repair Authorization number (RA), and provide the following information:
1. Model and serial number
2. Date of shipment, P.O. number, sales order number, or Pelco invoice number
3. Details of the defect or problem

If there is a dispute regarding the warranty of a product that does not fall under the warranty conditions stated above, please include a written explanation with the product when returned.

Method of return shipment shall be the same or equal to the method by which the item was received by Pelco.

RETURNS
To expedite parts returned for repair or credit, please call Pelco at (800) 289-9100 or (559) 292-1981 to obtain an authorization number (RA), and provide the following information:
1. Model and serial number
2. Date of shipment, P.O. number, sales order number, or Pelco invoice number
3. Details of the defect or problem

All merchandise returned for credit may be subject to a 20 percent restocking and refurbishing charge.
Goods returned for repair or credit should be clearly identified with the assigned CA or RA number and freight should be prepaid.

Green
The materials used in the manufacture of this document and its components are compliant to the requirements of Directive 2002/95/EC.

This equipment contains electrical or electronic components that must be recycled properly to comply with Directive 2002/96/EC of the European Union regarding the disposal of waste electrical and electronic equipment (WEEE). Contact your local dealer for procedures for recycling this equipment.
